WHY BROTHER?

Brother combines the latest technology with business relevant features - practical, efficient and reliable.

ADVANCED SCAN FEATURES

Ultrasonic Multifeed Detection

The Ultrasonic Multifeed Detection system uses sound waves to identify potential misfeeds, reducing the risk of damaged documents and lost data.

Advanced Reverse Roller System

The Advanced Reverse Roller is a paper separation system for exceptional paper feed efficiency, helping to prevent loss of content and keep scan flow moving.

IMAGE PROCESSING

Page Clean

Filter unwanted background marks such as hole punch circles and ink speckles.
Features: Binarization, Punch Hole Removal, Edge Fill, De-speckle, Background Processing.

Multi Stream

Save scanned images in three colour formats (full colour, mono, greyscale) for flexible filing and referencing.

Colour Dropout

Remove unwanted singular colours or complete background colour for sharper, easy-to-read text.

Blank Page Removal

Blank page scans can be automatically detected and removed, reducing file size when sharing and saving paper when printing.

Colour Detect

Eliminate the need to pre-sort colour and mono documents, saving preparation time.

Page Align

Prepare and align scanned images for a professional finish.

SOFTWARE COMPATIBILITY

Kofax 5.1 VRS Elite compatible

Kofax compatibility provides advanced accuracy for OCR; lowering document preparation time and improving scanned image content. Our new scanner range offers compatibility with this advanced technology, ensuring easy integration with one of the leading developers of scanning productivity software and systems.

Omnipage SE 18

Powerful OCR software to create searchable and easy-to-retrieve digital documents for storage in document management systems or Cloud storage.

TWAIN, ISIS, WIA, ICA, SANE

Standardised drivers for easy integration with solutions and systems.
